

## CARE AND MAINTENANCE

### CARE AND MAINTENANCE

Wooden garden furniture is made using selected Quality ACACIA PLANTATION WOOD from Malaysia. Care is taken to ensure that the timber is from approved well managed forest.

All wood components are properly kiln dried and items well constructed for maximum outdoor use.

Some surface hair cracks may appear due to loss of moisture.

This is a natural character of wood and not a defect.

To keep the quality and fine look of your garden furniture and validate your warranty you should regularly apply quality wood treatment oil as recommended by local retailer, always follow the application instruction given.

We recommend you keep your furniture covered when not in use, doing so will give you many years of enjoyment.

### SAFETY IN USE

Check fittings regularly to make sure these are tight and secure,

Heavy furniture items should always be moved by two people to avoid injury or damage to the item.

Do not drag furniture items.
