

WARRANTY

Butcher-block countertops are manufactured to the highest quality standards. Changes in temperature and humidity can affect natural wood products. Extreme changes in humidity may cause warpage. These are not manufacturing defects and are beyond our control. Proper installation and care are the best prevention.

Before installation inspect the counter tops for manufacturing defects. Warranty is void for counter tops that have been installed with clearly visible defects.

The warranty is for a 1 year guarantee against manufacturing defects only. The warranty is void if product is modified, subjected to excessive water or if the counter top is shipped unfinished. This warranty covers the cost of the material only.
