

Warranty

timber**chic**® is warranted against manufacturing defects for 30 days from the date of shipping, but prior to installation. Manufacturing defects are defined as defects in material, milling or moisture content that render the board(s) as shipped, unfit for wall application. Since wood is a natural product and not synthetic, standard industry practice allows for up to 5% of wall application shipped to have milling, handling, finish and/or grade defects. timber**chic**® is manufactured from river-reclaimed wood, checking, open or checked knots, mineral streaks, spalting, and worm holes are prevalent and not considered defects.

timber**chic**® must be applied to a wiped clean surface such as painted drywall, tile or paneling. Because this is a DIY product we understand that there are other substrates that this product will be applied to, however these are not covered under our warranty. timber**chic**® is not meant for exterior applications nor shower/tub bathrooms.

Please contact the retailer or wholesaler from which timber**chic**® was purchased.
